

Alexander Graham Bell

<http://gardenofpraise.com/ibdbell.htm>

Bell's father invented "Visible Speech"	to help deaf people learn to talk.
Alexander was self-taught	were Elisha Gray and Antonio Meucci.
He and his brother used a sheep's voice box	a school for teachers of the deaf.
His family moved to Canada	except for five years of schooling.
In Boston he opened	to help him overcome tuberculosis.
Bell's wife Mabel	had been deaf since age four.
For a wedding present he gave his wife	which set a world speed record.
Bell and his associate Thomas Watson	all but 10 shares of the Bell Telephone Company.
Other people experimenting with the telephone	experimented with transmitting sound.
For nineteen years	Bell was only one who could produce telephones.
Queen Victoria of England	to make a speaking machine.
He also invented a hydrofoil	wanted telephones to connect her castles.
